

**Patent Claims:**

- Sub A1
1. Cosmetic or dermatological preparations which are finely disperse systems of the water-in-oil type, comprising
    1. an oil phase,
    2. a water phase,
    3. at least one modified phyllosilicate which exhibits both hydrophilic and lipophilic properties, i.e. which has amphiphilic character and positions itself at the water/oil interface and
    4. at most 0.5% by weight of one or more emulsifiers[lacuna]
  2. Preparations according to Claim 1, characterized in that they are emulsifier-free.
  - Sub A2
  3. Preparations according to one of the preceding claims, characterized in that further cosmetic or pharmaceutical auxiliaries, additives and/or active ingredients are present.
  4. Preparations according to one of the preceding claims, characterized in that the content of one or more modified phyllosilicates is between 0.05% by weight and 10% by weight, advantageously between 0.1 and 2% by weight, based on the total weight of the preparations.
  5. Preparations according to one of the preceding claims, characterized in that, in addition to one or more modified phyllosilicates further pigments are present, in particular modified polysaccharides and/or microfine polymer particles and/or micronized, inorganic pigments chosen from the group of amphiphilic metal oxides, in particular from the group consisting of titanium dioxide, zinc oxide, iron oxides or iron mixed oxides, silicon dioxide or silicates, it being possible for the pigments to be present individually or as a mixture.
  6. Preparation according to one of the preceding claims, characterized in that it comprises UV filter substances, (one or more compounds) chosen from the group consisting of unsymmetrically substituted s-triazine derivatives, in particular 2,4-

bis[[4-(2-ethylhexyloxy)-2-hydroxy]phenyl]-6-(4-methoxyphenyl)-1,3,5-triazine and/or dioctylbutylamidotriazone.

7. Preparation according to one of the preceding claims, characterized in that it comprises sulfonated UV filters chosen from the group consisting of phenylene-1,4-bis(2-benzimidazolyl)-3,3'-5,5'-tetrasulfonic acid and its salts, benzene-1,4-di(2-oxo-3-bornylidenemethyl-10-sulfonic acid) and its salts, 2-phenylbenzimidazole-5-sulfonic acid and its salts, and sulfonic acid derivatives of 3-benzylidenecamphor and salts thereof.
8. Preparations according to one of the preceding claims, comprising one or more additives or active ingredients chosen from the group of astringents and/or antimicrobially active substances and/or substances effective against acne.

ADD A3
